It is here, in the heart of the Alps, on a journey lasting over 15 years through granite rock, pebbles and fine sand, that evian® water is purified and enriched with essential minerals to reach a perfect balance. Enclosed in two layers of moraine clay deposited here 30,000 years ago by glaciers, it is protected from any kind of pollution.

The Spa Quatre Terres, through its treatments directly inspired by this natural process, invites you to explore its journey. The treatments have been designed like a succession of slow journeys to the heart of the elements, leaving your body detoxified, energised, revitalised.

Four incredibly pure elements - clay, precious stones, crystals and

oils rich in trace elements - are the basis for deep-reaching treatments. Their action is strengthened by the benefits of ancestral American-Indian, Tibetan and Chinese techniques performed by the expert hands of our therapists.

Tui-Na Chinese energy massage, semi-precious stone facial massage, crystal wand foot reflexology... Whether you are in search of relaxation, beauty, slimming, re-energisation or sport, there is a treatment path to take you on a unique journey to yourself.

The Spa Quatre Terres has selected La Phyto's extensive range of clays to offer truly tailor-made treatments, as well as Gemology products which contain minerals and trace elements essential to skin's youthfulness.
